ASK ABOUT...

SECURE NOTEPAD

An application to secure your notes while allowing you to share them with others. Multiple Notes can be grouped and controlled in one.

Request a Demo Version

Secure Notepad

Simple Interface

Complete control over your text. Standard type toolbar gives you a notepad that is easy to use.

Powerful Interface

Once your notes are complete, secure them for protection. Notes can be shared with others by providing the password and/or encryption file.

About...

I have over 20 years of digital forensics and cybercrime experience, over 35 years of experience in software development. I have 10 years experience as a sworn police officer (Cobb County Police Department, Georgia), have served as a P.O.S.T. instructor, and regularly provides computer forensic services and cybercrime consultation to Fortune 500 corporations, individuals, and a wide variety of law enforcement agencies at the Federal, State, and local.

To date, I have conducted over 3,000 cases and have testified in several venues throughout the United States including some Federal jurisdictions. To learn more, please visit my company website - www.pminvestigations.com
